

THE AVERAGE AMERICAN WORKED FOR **192** DAYS LAST YEAR TO PAY FOR THE COST OF GOVERNMENT AND REGULATION.¹ WHAT IS SIX MONTHS OF YOUR LIFE WORTH TO YOU?

Big government requires big money, and the more you pay, the more it grows. But if you think things have gotten out of hand, you're not alone, and it isn't hopeless. Thousands have already come together to make small government a reality.

The Free State Project is a plan to find strength in numbers. All across the country, there are people who want to keep what they've earned, and who don't want to pay the government to make their choices for them. Outnumbered in their own states, they've decided to make a strategic move to New Hampshire, where people who love freedom can actually make a difference. Join us and you'll have the chance to fight for liberty in your lifetime.

New Hampshire has no income tax, no sales tax, and a history of turning down federal funds with regulatory strings attached. Over 200 years after being the first to declare its independence, the "Live Free or Die" state is once again on the cutting edge of freedom. To see how you can make a difference and enjoy a better, freer future, visit us at:
